Authoritative and visionary, this festschrift features 12 highly readable expositions of virtually all currently active aspects of nonlinear science. It has been painstakingly researched and written by leading scientists and eminent expositors, including L Shilnikov, R Seydel, I Prigogine, W Porod, C Mira, M Lakshmanan, W Lauterborn, A Holden, H Haken, C Grebogi, E Doedel and L Chua; each chapter addresses a current and intensively researched area of nonlinear science and chaos, including nonlinear dynamics, mathematics, numerics and technology. Handsomely produced with high resolution color graphics for enhanced readability, this book has been carefully written at a high level of exposition and is somewhat self-contained. Each chapter includes a tutorial and background information, as well as a survey of each area's main results and state of the art. Of special interest to both beginners and seasoned researchers is the identification of future trends and challenging yet tractable problems that are likely to be solved before the end of the 21st century. The Important Book Margaret Wise Brown,1990-03-10 The important thing about The Important Book -- is that you let your child tell you what is important about the sun and the moon and the wind and the rain and a bug and a bee and a chair and a table and a pencil and a bear and a rainbow and a cat (if he wants to). For the important thing about The Important Book is that the book goes on long after it is closed.What is most important about many familiar things -- like rain and wind, apples and daisies -- is suggested in rhythmic words and vivid pictures. 'A perfect book . . . the text establishes a word game which tiny children will accept with glee.' -- K.

Apart from that we've left it just as it was - a true collectors' cookbook especially for you. Now you can recreate your favourite cakes - the swimming pool, rocket and that train from the cover for your own child.
